**Next generation industrial fixtures:
CFRP structures using “in situ” health
monitoring.**

Ground Based Demonstrator Fixture

NLF, Leading edge fixture

Dimension

2014: Materialbaserad konkurrenskraft – förstudie

2014: RISE ToD ”Analytisk Processövervakning”

2015: SMF - Flyg

2015: Produktion 2030

2015: TempKomp

Ongoing projects, 2016

CFRP structures using “in situ” health monitoring in order to log the geometry of the fixture.

Feedback the measuring data in order to control the geometry of the full fixture.

Feedback the measuring data in order to control the geometry of a location point.
